

The production processes of zirconium carbide powder.

Changsha Langfeng Metallic Material Ltd. is specialized in production and sales of zirconium carbide powder. Many buyers have very vague understanding of zirconium carbide transaction process and production processes, they have asked me many times. Today I'd like to describe in detail the processes of the zirconium carbide powder production:

1. The technical department determine the process scheme according to customer's requirements ;
2. Raw material preparation;
3. Production and shop floor materials;
4. Raw material mixing ingredients;
5. An alloy of sintered carbide;
6. Milling, crushing, sieving;
7. Together batches and finished products mixed;
8. Products testing, packaging products out of the factory.
