

How to buy roses for industrial microwave equipment (3)

Five, signed a contract should contain content

1, the technical parameters of microwave drying equipment: Technical parameters check that it is true, some manufacturers to sell devices often exaggerated, just provide the technical parameters, the results far.

2, the production capacity (to provide samples of data): Production capabilities include hourly production capacity and production capacity for continuous operation, such as 8 hours or 16 hours of production, according to the test sample signed equipment production capacity, equipment acceptance testing equipment when the production and the key to whether the normal operation.

3, product quality standards: for example, dry water, color, achieve sterilization indicators, such as total bacterial count, coliform count, mold number. Extract is dried on, the active ingredient and the water content of the drug before and after drying is an important index.

4, microwave drying equipment delivery: clear equipment delivery and delayed delivery penalties.

5, microwave drying equipment Warranty: state equipment warranty for one year, therefore, the signing of the contract equipment warranty period of not less than one year.

6, microwave drying equipment prices: the quality of equipment and equipment prices have a direct relationship, attention careful comparison. Depends on the device structure, performance, high manufacturing costs of high-quality equipment, high price accordingly, tractors compared with cars, ordinary cars compared with advanced automobile, the price of course there are differences.

7. Acceptance of Terms of microwave drying equipment: a clear acceptance of the terms of equipment, including the installation period, commissioning period, the device uses the technical provisions, such as a time or hourly production, continuous operation every 8 hours or 24 hours of production, if how to reach the quality or yield penalties.
